## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 12, 20-24, 41-42 and 44 are rejected under 35 U.S.C. 102(b) as being anticipated by Wand et al. (US 5,585,036).

The reference discloses a chiral compound represented by formula I, which is useful as components of FLC composition in LC devices. FLC mixtures of the reference typically comprise from about 5% to about 50% by weight of one or more of the chiral nonracemic compounds of formula I. The reference further teaches that the liquid crystal mixture doped with from 1% to 50% chiral compound in reference claims 41-43. See the chiral compounds having a 2-fluoro-2-methyl tail in Tables 9 and 10, which the compounds read on the present claims. Also, see Example 4 on col. 13 and Table 12 on col. 31. The Example mixture comprising 10% of chiral nonracemic compound (MDW 1029) has  $10.2 \text{ nC/cm}^2$ . Therefore, the reference anticipates the claimed invention.

### *Double Patenting*

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686

Art Unit: 1756

F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-2, 8, 12, 20-22 and 40-46 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13, 15-23, 25, 27-35 and 38-43 of U.S. Patent No. 6,838,128. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed subject matters between the present claims and the reference overlap each other.

#### ***Response to Arguments***

5. Applicant's arguments filed 5/5/05, with respect to the rejections of claims 1, 12, 20-24 and 41 under JP 7-309858 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, new grounds of rejection are made in view of US 5,585,036 and 6,838,128 applied abovementioned.
